Use-Case Name: 3.0 View Organization Profiles

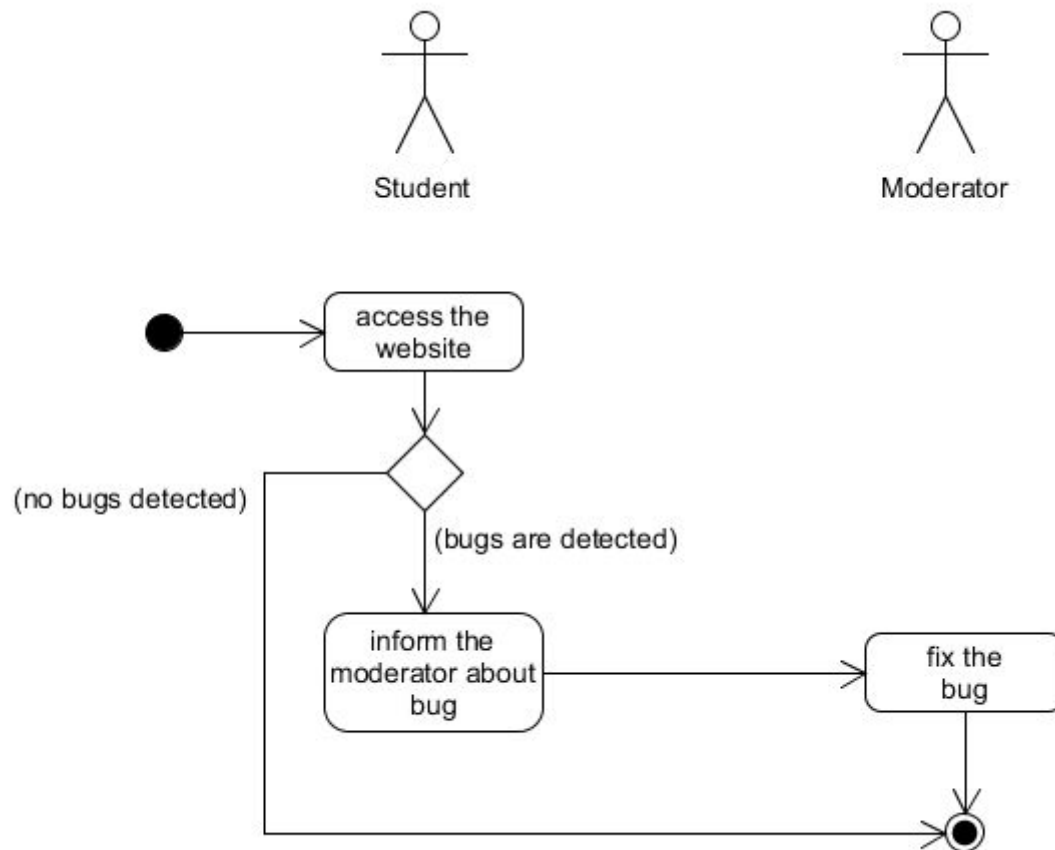

Description: This document aims to provide the specifications for use case 3.0 View Org Profiles. The first scenario is straightforward, which is the main functionality of this use case. If there are any bugs in the website, that is the only time the second scenario happens.

Preconditions: Use cases 1.0 and 2.0 must be accomplished at least once. The website should already have content when this use case is used.

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) A student view the website	1. The student accesses the website to view details about an organization.
Scenario 2 The student detects a bug on the website	1. When the student visitor observes a bug while viewing the website, the student can contact the moderator using the contact details given on the website. 2. The moderator will fix the bug and update the website.
