

TEAM PERFORMANCE ASSESSMENT

This Team Performance Assessment is designed to create an objective discussion about team performance during the course of doing the artifacts in CS 191 Software Engineering 1. It helps team members work out how well they are working at the moment and identify the areas they want to address to help them perform better in the implementation, test and release of the software (CS 192 Software Engineering 2).

This assessment has four areas of concentration in terms of team performance, namely,:

Purpose and Shared Direction. A team that has a shared understanding of what they are trying to achieve, why and what success looks like, produces best outcomes. They show the way and model right behaviors- both in terms of direction and how people behave and work together.

Result-oriented. A team pays attention to the things that matter and their proper direction. They make tough calls and consciously divide their time and stay focused on their joint goals.

Joint Accountability. A team's members take responsibility for their own part in delivering the team's goals and helping others to achieve them. Failing to deliver or letting others down is not OK.

Team relationships. Everyone treats each other with respect, is open on uncomfortable issues and takes time to understand others' needs. It's OK to admit mistakes and weaknesses.

INSTRUCTIONS:

- 1.) Use the descriptions below to score your personal assessment of the way that your team worked together. For each statement, give a rating from 0 to 4.
- 2.) Share your individual assessment with other team member to come up with an overall team assessment, calculating the average score for each category.
- 3.) The team should reflect on the results and develop an action plan to improve overall effectiveness in working together in the implementation and testing phase.
